### **DETAILED ACTION**

This action is responsive to communications: Amendment, filed on 3/28/06.

This action is made Final

Claims 1, 3-17, and 20-21 are pending in this application. Claims 1, 11, 12, 13, 20, and 21 are independent claims. In the Amendment, filed on 3/28/06, claims 1, 11, and 12 were amended, claims 2, 18, and 19 were cancelled, claims 22-28 were withdrawn.

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 13, 15-17, 20, and 21 are rejected under 35 U.S.C. 102(a) as being anticipated by Leshem et al. (US 5,870,559).

As per claim 13, Leshem et al. teaches a method of presenting information comprising: analyzing textual content of the information (col. 18, lines 22-45);

generating a signature based on textual content (col. 9, lines 56-68; Examiner interprets different type to be different textual content);

associating the textual content with image content according to said signature (col. 9, lines 56-68, Examiner interprets icons to be a image); and

displaying the image content to illustrate the information (col. 10, lines 15-36, col. 16, lines 35-48).

As per claim 15, Leshem et al. teaches a method of presenting information as recited in claim 13, wherein the image content is not included in the information (col. 9, lines 54-68, col. 10, lines 1-15).

As per claim 16, Leshem et al. teaches a method of presenting information as recited in claim 13, wherein metadata associated with the image content is correlated with the textual content according to said signature to determine the image content that is associated with the textual content (col. 10, lines 15-36, col. 16, lines 35-48).

As per claim 17, Leshem et al. teaches a method of presenting information as recited in claim 13, wherein the information includes a web site (fig. 14. item 196).

As per claim 20, it rejected with the same rationale as claim 13. (see rejection above)

As per claim 21, it rejected with the same rationale as claim 13. (see rejection above)

# Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-8, and 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leshem et al. (US 5,870,559) in view of Sciammarella et al. (US 5,982,369).

As per claim 1, Leshem et al. teaches A method of presenting a search result comprising: determining categories for found information by analyzing the content of the information (col. 18, lines 22-45);

correlating the categories with images that represent the categories (col. 9, lines 56-68; Examiner interprets different type to be different categories); and

displaying images that correspond to the categories (col. 9, lines 56-68, Examiner interprets icons to be a image);

wherein images corresponding to the found information are displayed when a user activates one of the categories (col. 10, lines 15-36, col. 16, lines 35-48).

However Leshem fails to teach analyzing the subject content of the information.

Sciammarella teaches analyzing the content of the information and correlating the categories with images that represent the categories. (column 2, lines 1-30)

It would have been obvious to an artisan at the time of the invention to include Sciammarella's teaching with method of Leshem in order to provide the user with a graphical display of search results that indicate relevancy of the results to the search terms.

As per claim 3, Leshem et al. teaches A method of presenting a search result as recited in claim 1, wherein the user activates one of the categories by dragging a cursor over the image that corresponds to the category (col. 16, lines 26-48).

As per claim 4, Leshem et al. teaches A method of presenting a search result as recited in claim 1 wherein 20 the display is a grid (fig. 4, item 80).

As per claim 5, Leshem et al. teaches a method of presenting a search result as recited in claim 1, wherein the information includes a plurality of web sites (col. 16, lines 26-48).

As per claim 6, Leshem et al. teaches a method of presenting a search result as recited in claim 5, further including providing a rotating display of content from the web sites (fig. 18, item 30).

As per claim 7, Leshem et al. teaches a method of presenting a search result as recited in claim 5, further including providing a video display of content from the web sites (col. 10, lines 1-15).

As per claim 8, Leshem et al. teaches a method of presenting a search result as recited in claim 5, further including rating each web site according to whether the web site includes image content that is relevant to textual content on the web site (col. 16, lines 26-48).

As per claim 10, Leshem et al. teaches a method of presenting a search result as recited in claim 6, wherein dynamically displaying content from the web sites includes showing representative images from the web site that correspond to textual content in the web site (col. 16, lines 26-48).

As per claim 11, it is rejected with the same rationale as claim 1. (see rejection above)

As per claim 12, it is rejected with the same rationale as claim 1. (see rejection above)

Art Unit: 2174

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Leshem et al. (US 5,870,559) Sciammarella et al. (US 5,982,369) further in view of Yamamoto et al. (US 6,467,026).

As per claim 9, Leshem and Sciammarella fail to teach a method of presenting a search result as recited in claim 1, wherein the information includes information stored on a DVD.

Yamamoto et al. teaches a method of presenting a search result as recited in claim 1, wherein the information includes information stored on a DVD (col. 9, lines 27-40)

It would have been obvious to an artisan at the time of the invention to include

Yamamoto et al.'s teaching with method of Leshem and Sciammarella in order to allow the data
to be permanently stored.

Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Leshem et al. (US 5,870,559) in view of Horvitz et al. (US 6,085,226).

As per claim 14, Leshem fails to teach a method of presenting information as recited in claim 13, wherein the image content is included in the information.

Horvitz teaches a method of presenting information as recited in claim 13, wherein the image content is included in the information (Fig. 15A)

It would have been obvious to an artisan at the time of the invention to include Horvitz et al. teaching with Leshem et al.'s method in order to provide user with a preview of the search results.

Art Unit: 2174

# Response to Argument

Applicant's arguments regarding claim 13, filed on 3/28/06 have been fully considered but they are not persuasive.

Applicant argued that Leshem fails to teach displaying the image content to illustrate the information: wherein said signature identifies words, phrases, expressions, and concept that said image may be useful in representing.

The examiner does not agree for the following reasons:

During patent examination, the pending claims must be "given >their< broadest reasonable interpretation consistent with the specification." > In re Hyatt, 211 F.3d 1367, 1372, 54 USPQ2d 1664, 1667 (Fed. Cir. 2000). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Applicant always has the opportunity to amend the claims during prosecution, and broad interpretation by the examiner reduces the possibility that the claim, once issued, will be interpreted more broadly than is justified. In re Prater, 415 F.2d 1393, 1404-05, 162 USPQ 541, 550-51 (CCPA 1969).

In this case, Leshem teaches this limitation because Leshem teaches displaying the image content that relates to type and format of the files. (col. 10, lines 15-36, col. 16, lines 35-48). The type and format of the files can be represented by words and phrases and they are concepts to those ordinary skilled in the art. (The concept of HTML would give those ordinary skilled in the art the knowledge as to what applications can be used to edit the file) Furthermore these

Art·Unit: 2174

images are useful in representing the information because they let the users know what applications can be used to show the content of the files.

Applicant's arguments with respect to claims 1, 11, and 12 have been considered but are deemed to be most in view of the new grounds of rejection.

#### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

# **Contact Information**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peng Ke whose telephone number is (571) 272-4062. The examiner can normally be reached on M-Th and Alternate Fridays 8:30-5:00.

Application/Control Number: 09/764,336

Art'Unit: 2174

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kristine L. Kincaid can be reached on (571) 272-4063. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
